Spalding DeDecker Welcomes John Fortunato as Construction Engineering Senior Project Manager

Rochester Hills, MI (September 17, 2021) – Spalding DeDecker (SD), a leading civil engineering, planning, and surveying firm, hires John Fortunato as Construction Engineering Senior Project Manager.

Mr. Fortunato’s experience includes construction engineering inspection, construction materials testing, contract administration, and project management on a variety of construction projects, including bridge and roadway reconstruction, capital preventive maintenance projects, and utility construction and rehabilitation, as well as municipal inspection for private development projects. John has over 23 years of experience in the construction of local, state, and federally funded projects. John’s construction experience, along with his communication skills and his knowledge of local ordinances and specifications, AASHTO, FHWA, and MDOT standards, practices, and current procedures provides a large benefit to SD’s staff and clients. John’s primary focus will be client development in the construction engineering industry. In his role as Construction Engineering Senior Project Manager, John will help geographically expand SD’s Construction Engineering service area, along with adding bridge inspection services. “John will lead our west and mid-Michigan construction engineering efforts and will assist in pursuing MDOT work,” said Steve Benedettini, president of Spalding DeDecker. “We are delighted to have John on our team.”

About Spalding DeDecker

Established in 1954 and celebrating its 68th year in business, Spalding DeDecker is an employee-owned consulting engineering, planning, and surveying firm specializing in infrastructure, land development, urban planning, and surveying. Headquartered in Rochester Hills, Michigan, along with several regional offices, Spalding DeDecker offers a diverse set of skills to clients seeking solutions to construct and maintain their infrastructure. The firm offers municipal engineering, construction engineering, transportation engineering, land development, pavement management, roof and building envelope assessments, land surveying services, and urban planning.
