Spalding DeDecker Welcomes Senior Project Manager Scott DeVries, PE to the Team.

Rochester Hills, MI (January 22, 2024) – Spalding DeDecker (SD), a leading civil engineering, planning, and surveying firm, hires Scott DeVries, PE as a Senior Project Manager.

Mr. DeVries comes to SD with more than 33 years of experience in both the public and private sectors. Scott is highly experienced in Local, State, and Federally funded programs, public engagement, permitting, and all aspects of a project, from design to delivery.

Scott successfully led and completed a multitude of infrastructure projects including water distribution studies, hydrologic studies, numerous water systems evaluations, and wastewater and sanitary sewer systems, among others.

Mr. DeVries' diverse experience at the City of Williamston brings valuable perspective to our team including a deep understanding of municipal intricacies and regulatory frameworks.

Scott received his Bachelor and Master of Science in Civil Engineering from Michigan State University. A registered PE in the State of Michigan, Scott has been recognized with multiple awards from industry associations including Michigan Society of Professional Engineers (MSPE) Capital Area Chapter Engineer of the Year and Michigan Water Environmental Association's (MWEA) Young Professional of the Year.

"As a highly skilled engineer with diverse experience, Scott is well respected throughout the industry, and is a welcome addition to Spalding DeDecker's Public Engineering group at our Lansing office," said Steve Benedettini, president of Spalding DeDecker. "We intend to tap his insights and perspectives on projects throughout the state."

About Spalding DeDecker

Established in 1954 and celebrating its 70th year in business, Spalding DeDecker is an employee-owned consulting engineering, planning, and surveying firm specializing in infrastructure, land development, urban planning, and surveying. Headquartered in Rochester Hills, Michigan, along with several regional offices, Spalding DeDecker offers a diverse set of skills to clients seeking solutions to plan, construct, and maintain their infrastructure. The firm offers municipal engineering, construction engineering, transportation engineering, land development, pavement management, land surveying services, urban planning, and landscape architecture.
